

JetStream Ionising Air Knife System

Product Code: JS-Ionising

The Meech JetStream Ionising Air Knife System is capable of being used in a diverse range of applications – both large and small.

Features

Benefits

Integral twin ionising bars	Provides superior ionisation performance whilst minimising maintenance
Air entrainment deflectors	Minimise the volume of potentially contaminated ambient air that is entrained by the air knife and blown on to the target substrate
Large plenum	Ensures even delivery of the airflow along the length of the air knife
Inner profile	Gives a high efficient air flow

Technical Characteristics

Air knives	Overall length from 200mm
Air knives	Available with Ex (ATEX) rated ionising bar option and either top or end air inlet positions
Filtration	As standard, rated to 5 micron
Silencing	Inlet/outlet blower silencer and acoustic enclosure options to control noise levels to as low as 70dBA
Control panel	Blower, ionisation and profiling
